TECHNICAL SKILLS

Programming Languages Java, JavaScript, TypeScript, Go, MATLAB

Markup Languages HTML5, CSS3, Markdown, $\text{\LaTeX}$

Frameworks and Libraries Angular, RxJs, React.js, Spring Boot, Express.js, Node.js, Redux Toolkit, Socket.io

Databases MySQL, MongoDB

Tools Git/GitHub, VS-Code, Eclipse, GNU/Linux, Finos Legend Studio

WORK EXPERIENCE

Project Engineer @ Wipro

Technologies: Java, Spring Boot, Angular, Microservices

October 2024 – Present | Bengaluru (Onsite)

- Strengthened core technical skills through comprehensive training and developed proof-of-concept (PoC) applications to evaluate potential solutions, demonstrating strong initiative and technical competence.

Client: Goldman Sachs

June 2025 - Present

- Developed and maintained data ingestion and publishing microservices using Spring Boot within an existing enterprise platform.
- Contributed to an in-house proprietary data platform by designing data models and building services consumed by multiple internal teams.
- Coordinated with cross-functional teams to define domain models, API specifications, and service-level integrations.

Junior Software Engineer @ Beingtheparent.com

A rapidly growing online discovery platform for parents

September 2023 – January 2024 | Bangalore (Onsite)

Technologies used: JavaScript, TypeScript, Node.js, React.js, SQL, MongoDB

- Developed and maintained backend services using Node.js, TypeScript, and Express, ensuring high performance and scalability.
- Implemented notification services for various features of the app. Optimized database queries to boost app performance.
- Implemented user tracking and analytics API, leveraging data-driven insights to enhance decision-making processes and improve overall system performance.

PERSONAL PROJECTS

Discourse — Online Discussion Platform

React, Redux Toolkit, RTK Query, Node.js, Express.js, MongoDB

🔗 | </>

- Built a full-stack discussion platform with threaded posts, rich-text editor, and responsive dark-mode UI.
- Implemented JWT-based authentication, role-based authorization, and secure password hashing using bcrypt.
- Added voting, commenting, and reply features with optimistic UI updates via RTK Query.

Organic Bazaar — Online Marketplace for Organic Products

Java, Spring Boot, Angular, Microservices

🔗

- Designed and developed a microservices-based e-commerce platform enabling users to purchase organic produce with support for both on-demand orders and configurable recurring subscription plans.
- Implemented RESTful APIs for product catalog management, order processing, and subscription scheduling using Spring Boot.
- Built responsive Angular interfaces for browsing products, managing subscriptions, and tracking order history.

Collective canvas

HTML5 Canvas API, TypeScript, WebSocket, Go

🔗 | </> </>

- Built a collaborative drawing platform from scratch by leveraging WebSocket and HTML5 Canvas API.
- Implemented WebSocket server using go standard library, that can handle multiple concurrent web-socket connections.
- Implemented various drawing tools like, pencil, rectangle, ellipse, flood-fill etc. along with undo-redo functionality.

EDUCATION

Dr. BR Ambedkar National Institute of Technology Jalandhar

Bachelor of Technology, Mechanical Engineering

July 2018 — June 2022

Cumulative Grade Point Average — 7.09

Kendriya Vidyalaya No. 2, AFS Chakeri, Kanpur

Central Board of Secondary Education

2016 — 2017

Grade — 83.80%
