TECHNICAL SKILLS

Programming Languages Java, JavaScript, TypeScript, Go

Markup Languages HTML5, CSS3, Markdown, L^AT_EX

Frameworks and Libraries Angular, RxJs, React.js, Spring Boot, Express.js, Node.js, Redux Toolkit, Socket.io

Databases MySQL, MongoDB

Tools Git/GitHub, VS-Code, Eclipse, GNU/Linux, Finos Legend Studio, Jenkins, Postman, Docker

EDUCATION

Dr. BR Ambedkar National Institute of Technology Jalandhar

Bachelor of Technology, Mechanical Engineering

July 2018 — June 2022

Kendriya Vidyalaya No. 2, AFS Chakeri, Kanpur

Central Board of Secondary Education

2016 — 2017

Grade — 83.80%

WORK EXPERIENCE

Project Engineer @ Wipro

Technologies: Java, Spring Boot, Angular, Microservices

October 2024 – Present | Bengaluru (Onsite)

- Strengthened core technical skills through comprehensive training and developed proof-of-concept (PoC) applications to evaluate potential solutions, demonstrating strong initiative and technical competence.

Client: **Goldman Sachs**

January 2025 – Present

- Contributed to the modernization of legacy Spring-MVC applications by migrating modules to Java 17, Spring Boot, and Tomcat 10, improving maintainability and reducing technical debt, automating the whole process by leveraging AI tools like GitHub Copilot.
- Developed and maintained enterprise-grade applications using Java, Spring Boot, Hibernate/JPA, and MySQL, supporting 20,000+ business users.
- Developed and maintained data ingestion and publishing microservices using Spring Boot within an existing enterprise platform.
- Contributed to an in-house proprietary data platform by designing data models and building services consumed by multiple internal teams.
- Coordinated with cross-functional teams to define domain models, API specifications, and service-level integrations. Participated in peer code reviews, promoting clean code practices and improving overall code quality across the team.

Junior Software Engineer @ Beingtheparent.com

A rapidly growing online discovery platform for parents

September 2023 – January 2024 | Bangalore (Onsite)

Technologies used: JavaScript, TypeScript, Node.js, React.js, SQL, MongoDB

- Developed and maintained 10+ backend REST APIs using Node.js, TypeScript, and Express, supporting 10,000+ monthly active users while maintaining sub-300 ms average response times for core endpoints.
- Designed and implemented a notification service powering 100,000+ monthly notifications across multiple application features, while optimizing MongoDB queries and indexes to reduce average API response times by 30%.
- Built user tracking and analytics APIs that processed 1M+ user events per month, enabling product teams to monitor user engagement, identify feature adoption trends, and support data-driven product decisions.

PERSONAL PROJECTS

Organic Bazaar

Online Marketplace for Organic Products (Java, Spring Boot, Angular, Microservices)

- Designed and developed a microservices-based e-commerce platform enabling users to purchase organic produce with support for both on-demand orders and configurable recurring subscription plans.
- Implemented RESTful APIs for product catalog management, order processing, and subscription scheduling using Spring Boot.
- Built responsive Angular interfaces for browsing products, managing subscriptions, and tracking order history.

Collective canvas

A Collaborative whiteboarding platform (HTML5 Canvas API, TypeScript, WebSocket, Go)

- Built a collaborative drawing platform from scratch by leveraging WebSocket and HTML5 Canvas API.
- Implemented WebSocket server using go standard library, that can handle multiple concurrent web-socket connections.
- Implemented various drawing tools like, pencil, rectangle, ellipse, flood-fill etc. along with undo-redo functionality.
